ABSTRACT. In light of the Iraqi Supreme Judicial Council No. (74) for the year 2000 and its influence on the economic and commercial side, this study attempts to illustrate the viability of founding the Iraqi Commercial Court. It is the whole seed. Making commercial conflicts more swiftly and efficiently resolved through establishing an expert commercial judiciary is the goal. Specialized judges with high levels of expertise and knowledge help ensure that court judgements are successful in both processes and causes. In light of the statement published by the Supreme Judicial Council No. (74) for the year 2020, the research focuses on the efficacy of the Iraqi Business Court in addressing commercial disputes.
